I am a skilled MERN Stack developer with expertise in building dynamic and scalable web applications. Proficient in React.js for front-end development, Express.js and Node.js for server-side operations, and MongoDB for database management.

PROJECTS

1 E-tutor : Cutting-edge e-learning Platform

- Developed an innovative e-learning platform for primary to secondary school students,
- leveraging technologies such as WebRTC, Socket.io, Next.js, Tailwind CSS, Express.js, GraphQL, and MongoDB.
- The platform facilitates live classes, real-time communication between students and teachers,
- and includes features for accessing previous lectures, submitting homework, and tracking progress.
- Implemented strict authentication measures and ensured each class has a separate secure classroom.

2 Full-Featured E-commerce Platform:

- Developed a feature-rich e-commerce platform leveraging MERN (MongoDB, Express.js, React.js, Node.js) stack with Next.js for optimized rendering,
- Implemented dynamic product listings with filtering and sorting functionality
- Established secure user authentication, authorization, and user account management with profile and order history.
- Utilized Next.js for server-side rendering and responsive design as well as implemented search functionality
